Transmission of Covid-19 – First aiders giving treatment to SCC members and visitors	<ul style="list-style-type: none"> All first aid kits have been provided with disposable aprons, disposable gloves and face mask. This is because first aiders are likely to have close 	1	2	2				

What are the hazards?	What are you already doing to eliminate or	Estimate of risk (see box above)			What further action is necessary to eliminate	Action by (who)?	Action by (when)?	Action completed
	<p>contact with a person who is unwell. The risk of aerosol producing techniques being performed to an individual as a first aider is very small but the use of the mask is recommended as good practice. The face covering can be placed over the casualty's mouth and nose if there are concerns regarding covid-19 risk.</p>							
Transmission of Covid-19 – in the event of an emergency	<ul style="list-style-type: none"> In an emergency, e.g. an accident, fire, break-in or trespass, social distancing does not have to be maintained if it would be unsafe to do so. Members/visitors involved in providing assistance to others should pay particular attention to sanitisation measures immediately afterwards, including washing hands. 	1	2	2		All All		

Notes:

Face Coverings

The government have made it mandatory to wear a face covering in certain scenarios. Face coverings are not classed as items of PPE as they do not protect the wearer from covid (according to current government advice). The face covering is worn to protect others from the risk of the wearer being asymptomatic. A small number of face masks will be made available by SCC for those that require them. SCC members, visiting teams and supporters will need to provide their own face covering.

A face covering can be very simple and may be worn in enclosed spaces where social distancing isn't possible. It just needs to cover your mouth and nose. It is not the same as a face mask, such as the surgical masks or respirators used by health and care workers. **Supplies of PPE, including face masks, must continue to be reserved for those who need them to protect against risks in their workplace, such as health and care workers, and those in industrial settings like those exposed to dust hazards.**

It is important to know that the evidence of the benefit of using a face covering to protect others is weak and the effect is likely to be small, therefore face coverings are not a replacement for the other ways of managing risk, including minimising time spent in contact, using fixed teams and partnering for close-up work, and increasing hand and surface washing. These other measures remain the best ways of managing risk in the workplace and government would therefore not expect to see employers relying on face coverings as risk management for the purpose of their health and safety assessments. In relation to PPE, where you are already using PPE in your work activity to protect against non-COVID-19 risks, staff should continue to do so.

Where face coverings are worn, the following government guidance must be followed:

- wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before putting a face covering on, and after removing it
- when wearing a face covering, avoid touching your face or face covering, as you could contaminate them with germs from your hands
- change your face covering if it becomes damp or if you've touched it
- continue to wash your hands regularly
- change and wash your face covering daily
- if the material is washable, wash in line with manufacturer's instructions. If it's not washable, dispose of it carefully in your usual waste
- practise social distancing wherever possible

Any activities that have to be undertaken within 2m of another person must be carefully considered and the first question is whether the activity can safely go ahead. There are instances where activities can be carried out with a 1 metre social distance in place but these must be limited to as short a time as possible and where other additional measures have been identified to protect people from the risk of contracting the disease.

How to raise a concern

- Speak to a member of the SCC committee
- use the [HSE contact form](#)
- contact HSE by phone on 0300 003 1647
